

HAWKER® ENERGY-PLUS™

More Power by Design

The HAWKER® ENERGY-PLUS™ battery is specifically designed to deliver in demanding environments. If your trucks are operating in critical applications, making long runs, high lifts, and using attachments that require added power, the HAWKER® ENERGY-PLUS™ battery can keep them moving faster and working longer.

The HAWKER® ENERGY-PLUS™ battery employs a higher amp hour positive plate design to pack more active material – and up to 18% more power – into the same space. It also delivers longer life by maintaining a proper balance of active material and electrolyte.

The HAWKER® ENERGY-PLUS™ battery uses greater surface area full size positive plates to produce higher sustained voltages and longer run times – without sacrificing longevity. This powerful design means our batteries provide ultimate power for a longer time.

So when your operation depends on a heavy-duty battery – a battery that can stand up and deliver even under the most demanding applications – you can depend on the power of the HAWKER® ENERGY-PLUS™ battery.

To learn more about the HAWKER® ENERGY-PLUS™ battery, call 1-877-7HAWKER to contact your local HAWKER® representative.
